RE: PRICE INCREASE EFFECTIVE FEBRUARY 1, 2015

Dear Freedom Customer

Freedom Designs, Inc. will be increasing retail prices an average of 2% on our products, many of which are custom coded. Increases are necessary due to rising costs of raw materials, manufacturing operating costs including insurance, labor and freight. We have held off raising prices of many of products over the past years, but find it necessary at this time to exercise this slight increase. With all of our products, we will continue to absorb standard ground freight costs domestically. This price increase will not affect current retail base prices of any Freedom Designs wheelchair frame model number.

Specific pricing of items will be provided in the coming weeks. Most will be sent electronically as well as being available on our website. This will be effective February 1, 2015.

Please notify the appropriate associates within your business of this change. We will send out notices electronically, also by sales reps and via the U.S. mail service, but we recognize that the information may not always get to its proper destination. Thank you for forwarding this within your organizations.

As always, any orders or quotes that have been processed prior to the February 1, 2015 increase will be honored for 90 days from time of quote. Please contact your Freedom sales representative with any questions. As always, thank you for your continued support of the Freedom Designs products and services.

Sincerely,

Bob Gardner
