Re: Assigned HCPCS Codes for DME Billing

Pediatric P.R.O. CG Code Authorization

Freedom Designs, Inc. has received confirmation of code approval and assignment for the P.R.O. CG Pediatric Tilt-in-Space Wheelchair model number PRO-30300 and the P.R.O. CG SE Pediatric Tilt-in-Space Wheelchair model number PRO-30302. The HCPCS code approved for both models is E1233.

We can now tell our customers that the pediatric version of the P.R.O. CG is now code verified for funding by PDAC. It has already been added to the DMEPDAC crosswalk listing under E1233.

We are anticipating the confirmation for the approval for the P.R.O. CG Adult Tilt-in-Space Wheelchair to happen at any time.

Thanks,

The Freedom Team
