

Custom Molding

This 1 day session is designed for the Provider, Clinician or RTS with a minimum of 2 years experience in seating and wheeled mobility intending to use Pindot ContourU seating systems. Completion of this program will earn the participant certification for ContourU seating, and .75 CEU's authorized by the University of Pittsburgh.

The participants will:

- Gain an understanding of the molding process
- View a demonstration of molding techniques recommended by Pindot
- View a digitizing demonstration utilizing the Pindot Skribbl'r digitizing system
- Learn to determine proper size of seating system
- Review features of poured vs. carved foam
- Become familiar with the options, accessories and modifications that are available with custom seating systems.
- View case studies and unique seating systems.
- Experience through hands on, the molding, digitizing and ordering process for custom molded seating systems.

Note: This shorted version of the Pindot certification program excludes the segments on Silhouette Seating systems, clinical applications and cushion selection which normally covered in the full, 2 day program.

Courses are held at Invacare Corp,
1200 Taylor St.
Elyria, Ohio
